AGO's All Lines Accounting System on the Web (ASWeb)

In the market for a new Accounting System? Pick one ripe with features for the most fruitful results.

While Insurance Accounting is probably the most complex of all accounting systems, you need flexibility along with features that you value so you can process your business quickly, easily and efficiently without the probability of error.

Is your customer service department swamped with billing inquiries from your customers? Then tailor your customer billing statement to their preference. Set up your agency and direct-bill forms to reflect each producer's specific commission agreement. Are you chasing after earned but unpaid premium? Craft payment plans and automatic triggers to make it a thing of the past.

With AGO, you get a single entry system that even addresses oversights involving pre-paid deposits. ASWeb features comprehensive functions with a great deal of flexibility that allows you to customize your own views, processes, statements, billing protocols, cancellation methods and more, enabling you to process a high volume of business without the hassle.

AGO's Accounting System on the Web (ASWeb) is a comprehensive browser-based program designed to make insurance accounting easier and more efficient. Features-rich, ASWeb handles premium billing, premiums receivable, commission, return premiums payable and reporting. ASWeb is a stand-alone product or can be used as part of a complete AGO insurance platform. It can also be integrated with your current in-house package or any third party software.
